

- i) The second stage of Herbert Blumer is the legitimization of a problem i.e., Social Problem
- a) which means to accept a social Problem
 - b) It is a conformance that the social Problem exists.

(ii) For example child labour is a social Problem in India.

- a) We can see that this Problem exists and there is a law for this Problem.
- b) This is an accepted Problem.

(iii) The solution for this Problem was the government should take care of the children and give support to them

- a) In this Problem if the children are orphans the government should take care
- b) Else their parents are to be punished
